## Summary

I am software developer; I have 3.5+ years of experience in this industry. I am working on various technologies; also I am working on the frontend & backend technologies. I excel at working with a team, having experienced managing a remote group of developers, I am also capable of single-handedly delivering projects from start to finish.

- Worked on many custom modules and widgets using React JS/CSS/HTML and made those cross-browsers consistent.
- consistent. Utilised Node.js, Socket.io, Redis and Angular for scalable website architecture and realtime technology.
- Comfortable working with MEAN(MongoDB, Express, Angular, NodeJS) stack.
- Strong development skills including RESTful Web Services.
- Highly adaptable in quickly changing technical environments with very strong organizational and analytical skills.

## Experience

### Full Stack Developer

BVM Infotech

Jan 2020 - Present (3 years 8 months)

## Education

### Lukhdhirji Engineering College - Morbi

Bachelor of Engineering - BE, Information Technology

2016 – 2020

## Skills

Next.js • Node.js • HTML • Full-Stack Development • Tailwind CSS • Express.js • Jest • React.js  
• JavaScript • Node.js

## Projects

### [MyLaminin](#)

**Technologys** : React js, Next js, Node Js, Redux, Material UI, Mongo-DB

**Details:** My Laminin are bringing a new blockchain-enabled document sharing and verification service to market. That will transform the critical eligibility determination function at the core of private and public sector programs. These are putting people in complete control of their credentials and respecting their personal data privacy. And that will increase government and private sector operational efficiencies by reducing fraud and traditional audit control requirements.

### [Optery](#)

**Technologys** : Next js, Redux, MUI, Tailwind Css

**Details:** Optery's handling of the core data removal task outshines the rest, and its free tier brings privacy protection to those who can't afford expensive subscriptions. In the realm of personal data removal, Optery is our Editors' Choice .

### [APT](#)

**Technologys** : React js, Redux, MUI

**Details:** APT provides functionality to manage the supplier and customer data, orders and their product details.

### [Luci](#)

**Technologys** : React.js, Redux, SCSS, Antd

**Details:** Using the spending data that you share with luci, luci's patent pending technology calculates what your rewards would have been if you had spent your money using different credit cards. luci calculates your reward potential for all the credit cards that are in luci's database, and provides you with a personalized recommendation on cards that could give you the most reward for your spending habit
