BVM Infotech

PROJECTS

MyLaminin 🔗
    Technologys : React js, Node Js, Redux, Material UI, Mongo-DB, HTML, CSS
    Details: My Laminin are bringing a new blockchain-enabled document sharing and verification service to market. That will transform the critical eligibility determination function at the core of private and public sector programs. These are putting people in complete control of their credentials and respecting their personal data privacy. And that will increase government and private sector operational efficiencies by reducing fraud and traditional audit control requirements.

Optery 🔗
    Technologys : Next js, Redux, MUI, Tailwind Css, HTML, CSS
    Details: Optery's handling of the core data removal task outshines the rest, and its free tier brings privacy protection to those who can't afford expensive subscriptions. In the realm of personal data removal, Optery is our Editors' Choice .

EduHelth 🔗
    Technologys : Next js, Redux, MUI, Tailwind Css, HTML, CSS
    Details: EduHealth is a cloud-based software designed for school nurses. It streamlines student health management, offering quick access to health data, task automation, report generation, and document scanning for efficient record management.

Fair-Play 🔗
    Technologys : Next js, Redux, Material-UI, Socket.io, HTML, CSS
    Developed a secure betting app offering a variety of betting options, including sports betting and 400+ casino games.
    Ensured complete 100% safety for users' transactions and provided a seamless mobile experience.

ADDITIONAL HIGHLIGHTS

- Strong focus on delivering clean, modular, and maintainable code.
  - Consistent track record of enhancing application performance and scalability.
